Profile

As a Motivated and detail-oriented Software Engineering student, I am eager to apply my technical expertise in programming, problem-solving, and software development to real-world challenges. With hands to experience in building web and mobile applications, a strong foundation in algorithms and data structures, and a drive to continuously learn and grow, I am excited to contribute to impactful projects during an internship. My goal is to use this opportunity to enhance my skills, collaborate with industry professionals, and make meaningful contributions to the field of software engineering.

Education

Bachelor of Science in Software Engineering,
Adama Science and Technology University
3rd year software engineering student

Adama, Ethiopia

Programming Languages

Java

Advanced programming

C++

Fundamental of programming

CSS

Web and Mobile application development

Python

Introduction to computing

HTML

Web development

MySQL

Database management

Interests

Exploring new technologies, Gaming, Innovation and creativity, Cooking, Teamwork and organization

Technical skills

Problem-Solving

Strong analytical and logical thinking skills to break down complex problems and devise efficient solutions.

Object-Oriented Programming (OOP)

Solid grasp of OOP principles: **Encapsulation, Inheritance, Polymorphism, and Abstraction.**

- Experience applying OOP concepts in **Java** and **C++** to build modular and reusable code.

Database Management Systems (DBMS)

Proficient in designing and managing relational databases using **MySQL**.

Data Structures and Algorithms

Strong understanding of core data structures (arrays, linked lists, stacks, queues, trees, graphs, hash tables).

- Proficient in implementing and analyzing algorithms (sorting, searching, dynamic programming, greedy algorithms).

Advanced Programming

Skilled in advanced programming concepts such as **multithreading, memory management, and exception handling.**
